WARDROBE-IN ECOMMERCE -WEBSITE

1. Introduction

1.1 Project Overview

The **Wardrobe-In E-Commerce Website** is an interactive online shopping platform where users can browse fashion products, add them to the cart, remove them, and view the total price dynamically. The project follows **React best practices**, including a **component-based architecture**, **global state management**, and **client-side navigation**.

1.2 Objective

The main goals of this project are:

- Provide a **user-friendly** and **intuitive shopping experience**.
- Implement **efficient state management** using **Context API and useReducer**.
- Enable **seamless navigation** with **React Router**.
- Ensure **modern styling and responsiveness** using **Tailwind CSS**.
- Enhance **performance** with **Vite** for faster development and build times.

2. Technologies Used

Technology	Purpose
React.js	UI development with reusable components
React Router	Enables client-side navigation between pages
Context API	Manages global state (cart functionality)
useReducer Hook	Handles state updates efficiently (add/remove items)
Tailwind CSS	Provides responsive and modern UI styling
JavaScript (ES6+)	Implements dynamic UI logic and interactivity
Vite	Provides a fast development server for React applications

3. Features & Functionality

3.1 Displaying Products (Home Page)

The Home Page displays a **list of fashion products**, each showing:

- **Product name**
- **Price**

- **"Add to Cart" button**

Functionality:

✅ Clicking **"Add to Cart"** updates the **global cart state** via **Context API**.
✅ The button dynamically changes when a product is added.

3.2 Managing the Shopping Cart (Cart Page)

The Cart Page allows users to:

- **View items** added to the cart.
- **See the total price** of selected items.
- **Remove products** from the cart.

Functionality:

✅ Clicking **"Remove"** updates the **cart state** and removes the item.
✅ The **total price updates dynamically** as items are added/removed.

3.3 Global State Management (CartContext)

Instead of **prop drilling**, **Context API** + **useReducer** is used for cart management.

- **useContext**: Provides global access to the cart state.
- **useReducer**: Handles cart operations:
  ✅ ADD_TO_CART – Adds a product to the cart.
  ✅ REMOVE_FROM_CART – Removes a product from the cart.

3.4 Navigation (React Router)

✅ **Navbar component** provides links to **Home** and **Cart Page**.
✅ **React Router** handles **client-side navigation** efficiently.

4. UI & Styling

- **Tailwind CSS** is used for **clean and modern styling**.
- **Responsive design** ensures the site works on **desktop, tablet, and mobile**.
- **Flexbox & Grid** layouts are used for structured product display.

5. Development & Deployment

5.1 Development Workflow

1️⃣ **Initialize React project** using Vite for a fast setup.
2️⃣ **Install dependencies**: React Router, Tailwind CSS, Context API.
3️⃣ **Set up components** for modular development.
4️⃣ **Implement state management** using Context API and useReducer.
5️⃣ **Apply Tailwind CSS styling** for a modern UI.

5.2 Running the Project

✅ Install dependencies:

nginx

CopyEdit

npm install

✅ Start the development server:

arduino

CopyEdit

npm run dev

6. Testing & Debugging

6.1 Functional Testing

✓ Checked **"Add to Cart" functionality** for correct updates.
✓ Verified **"Remove from Cart"** correctly removes items.
✓ Ensured **total price updates dynamically**.
✓ Confirmed **navigation works smoothly** using React Router.

6.2 Debugging Challenges & Fixes

❌ **Issue:** React Router navigation was not updating the page correctly.
✓ **Fix:** Wrapped the App component inside <BrowserRouter>.

❌ **Issue:** Cart state was not updating properly.
✓ **Fix:** Used **useReducer** instead of **useState** for better state management.

7. Conclusion

The **Wardrobe-In E-Commerce Website** successfully implements a **modern shopping experience** with **React, Context API, React Router, and Tailwind CSS**. It follows **best practices** for state management and UI design while ensuring **seamless navigation and responsiveness**.
